

### This is XACT

## PURPOSE

The purpose of this course is to provide solid beginner level understanding of XACT mine scheduling software.

## HOW WE DO IT

The course will take users through a typical open cut XACT model. We follow the typical steps used to create a model and, along the way, highlight any traps attendees may face in the process. We discuss real world challenges faced during XACT scheduling and how to overcome them.

## WHAT YOU LEARN

At the completion of the course, the user will be able to competently schedule with a basic XACT model. They will have a solid understanding of what is inside the “Black Box” of XACT software to help them build in the variables needed to produce a realistic production profile.

## DAY 1

- This module of training will focus on the tools used most commonly by XACT workgroup users with Scheduler and Read Only capability. It will also provide a basic outline of the fundamental components of an XACT model.

## DAY 2

- Training is targeted at the Developer mode, looking at key functions such as expressions, advanced dependencies, parameters databases/curves and so forth. Focussed around capability only available in the Builder/Maintenance and Validator modes.

## LOCATIONS

- Brisbane
- Mackay
- Perth
- Onsite training available on request.
- Townsville
- Newcastle

# TRUSTED EXPERTISE. PROVEN OUTCOMES.
