

COURSE OUTLINE

PURPOSE

The concept of this course is to provide participants with an insight into the requirements and drivers of long term planning for mine site modelling and evaluation.

HOW WE DO IT

The course is run as a lecture/presentation providing an overview into the planning requirements, system tools and option analysis required from a long term plan.

WHAT YOU LEARN

An introduction to the long term planning processes, desired outcomes, phases of planning cycle, and option management - it will provide the participant with some example tools to assist in conceptual analysis and option evaluation.

DAY 1

- ▣ **Module 1** - Introduction to Long Term Planning Objectives
- ▣ **Module 2** - Model development, Equipment selection, JORC considerations, Forecasting key assumptions
- ▣ **Module 3** - Option development, Parallel option project management, Optimal production output analysis
- ▣ **Module 4** - Option evaluation, Communication practices, Knowledge retention solutions

LOCATIONS

- ▣ Brisbane
- ▣ Mackay
- ▣ Perth
- ▣ Onsite training available on request.
- ▣ Townsville
- ▣ Newcastle

TRUSTED EXPERTISE. PROVEN OUTCOMES.
